PROFILE

Seeking opportunities in software engineering and full-stack development where I can apply my skills in web, mobile, and AI-driven systems to real-world projects. I have hands-on experience building and deploying full-stack applications with secure authentication, role-based access control, and database-driven architectures. With a strong interest in Artificial Intelligence and Machine Learning, I aim to contribute to innovative solutions while continuously growing in a collaborative and professional environment.

EDUCATION

Bachelor / Computer Science

2021 – 2026

Imam Abdulrahman Bin Faisal University 🔗

PROFESSIONAL EXPERIENCE

MECC AI Hackathon – Middle East Corrosion Conference

11/2025 – 11/2025

AI & Data Engineer (Hackathon Project) 🔗

AL Khobar, Saudi Arabia

Developed an AI-driven inspection deferral decision system for oil & gas facilities. Contributed to data preparation, machine learning modeling, and risk-based analysis to support intelligent inspection scheduling.

Technologies: Python, Machine Learning, Random Forest, PostgreSQL, OpenAI API

King Fahad Medical City (KFMC)

06/2025 – 08/2025

Worked as a full-stack developer on a production-level Management Issue System. Developed secure web applications with role-based access control, database design, authentication, and deployment. Contributed to improving operational efficiency through automation, system integration, and structured workflows.

Technologies: ASP.NET 🔗 (C#), SQL Server, HTML, CSS, SMTP

SKILLS

Web Development: HTML, CSS, JavaScript, React.js, Tailwind CSS, ASP.NET 🔗 (C#), Node.js, Express.js, RESTful APIs

App Development: Dart, Flutter, Android Studio

Programming Languages: C#, Java, Python, JavaScript, SQL, C++

AI & Machine Learning: Python, Machine Learning Models, Data Analysis

Databases: Microsoft SQL Server, MySQL, MongoDB, Database Design & Normalization

PROJECTS

Movie Ticket Booking System 🔗

08/2025 – 09/2025

Full-Stack MERN Project

Developed a complete movie ticket booking platform featuring secure user authentication, online payment processing, an admin dashboard for managing movies and showtimes, and automated email notifications. Designed with a scalable RESTful architecture and modern UI for a smooth user experience.

Technologies: MongoDB, Express.js, React.js, Node.js, Stripe, REST APIs

Management Issue System

07/2025 – 08/2025

Full-Stack Web Application

Designed and developed a production-ready management issue system to handle maintenance and operational requests within an organization. Implemented role-based access control with separate dashboards, secure authentication, database-driven workflows, email notifications, and real-time communication features.

Technologies: ASP.NET 🔗 Web Forms, C#, Microsoft SQL Server, HTML, CSS, SMTP
